PROFILE

15+ years in web development, freelancing through FullBL since 2013. I deliver PHP projects end-to-end — APIs, portals, headless sites, e-commerce and managed Linux hosting on my own platform — for agencies and established teams. Former Team Lead at Facile.it; I can join existing workflows or own a project with full technical responsibility.

PROFESSIONAL EXPERIENCE

2013–present **Freelance full stack developer** FullBL

Ongoing practice since 2013; from 2013 to 2019 it also ran alongside the company roles below.

- Projects for agencies and clients: Symfony, Laravel, API Platform, Vue.js, portals, headless sites and e-commerce.
- Managed Linux hosting on my own platform: deployments, backups, updates and service continuity.

2016–2019 **Team Lead** Facile.it

- Led a back-end team on the contact-centre platform and high-traffic REST services.
- Symfony, Docker and Kubernetes: iterative releases, automated tests and Agile team coordination.

2015–2016 **Lead Developer** MySecretCase

- Technical lead for the Magento e-commerce platform, WordPress blogs and Nginx infrastructure.

2013–2015 **Developer** Marzapane.de

- Proprietary subscription-box platform with Stripe payments and an Nginx-based stack.

2010–2013 **Web Developer** Internodo

- Management tools for telephony and home automation (Asterisk), e-commerce and PHP/JS sites with Joomla, Drupal, WordPress and PrestaShop.

2008–2009 **Apprentice Developer** AX Professional

- First professional role with VB.NET, ASP.NET, SQL/MySQL and help-desk support.
